

QCTool V6.x

Installation Instructions for CD-ROM Installation

Serial Number Installation ONLY

QCTool offers data processing and quality control for small and very large data files as well as gridding and mapping for a number of different types of data. It is suitable for in field and in office processing as well as data processing and analyses of laboratory data.

Our CD-ROM Installation offers fast installation. Several example files are included.

QCTool offers import of general XYZ ASCII column format files in various forms plus Excel .csv, BINARY XYZ, Marine Magnetics, Scintrex CGx, magnetometer and IPR12 formats, GEM and Geometric magnetometer formats as well as formats for Geonics, GDD, GSSI, Zonge and ELREC IP/Resistivity data, Micro-G, Zonge, SeaSpy, Stratagem, Phoenix. General formats such as AMIRA, .usf format, SEGY, Geosoft .gdn, Geosoft .gdb, VLF formats and a large number of other formats including grid, DEM and magnetic observatory formats.

A Serial Number is on the CD or provided to you via email from QCTOOL Support or your agent. You will be requested for this during the installation process. You must be online to complete the registration process. Please insure that you do not have any firewalls set up in such a way to interfere with this process.

Do not lose this serial number and do not abuse it. You have a limited number of registrations.
The serial number is your license.

QCTool offers an update process through the internet. To find this link, look under "HELP".

If using a CD:

Insert the CD into your CDRom.

If AutoRun is configured on your computer, the installation will begin automatically

If not, Run CD_Drive:\ QCTool\QCTool_Setup.exe

If using a downloaded installation file:

Obtain from: <https://www.qctool.ca/downloads.php>

Simply execute the downloaded executable

--- The installer must have administrative privileges.

After installation, it is recommended to check the following environment variable:

Access environmental variables through Control Panel / System / Advanced

Add "c:\Program Files\QCTool\bin" to the Path variable

Note: If you have installed QCTool into a directory other than "c:\Program Files\QCTool" (the default directory) ensure that you use that path in the above step.

You must now re-boot your computer.

Moving a License to Another Computer

First, deregister the license on the computer that you no longer wish to use by selecting "Deregister QCTool" from the Start menu or "Deregister a QCTool license" under the HELP menu on the main toolbar with the software. Then, install and register on the new computer.

IMPORTANT: A manual can be found on the QCTool group in the Start menu under **HELP** or there are Manuals, Tutorials and Examples found in subdirectories on the installed hard drive beneath the main installed QCTool directory

Please contact us if you have any questions: QCTool Support Department
